Subject Index

Volume 79, July-December 1996

A

A_{2A} adenosine receptor
Binding of the Novel Nonxanthine A_{2A} Adenosine Receptor Antagonist [^{3}H]SCH58261 to Coronary Artery Membranes, 1153

A_{2A} receptor antagonist
Binding of the Novel Nonxanthine A_{2A} Adenosine Receptor Antagonist [^{3}H]SCH58261 to Coronary Artery Membranes, 1153

$\alpha_v\beta_3$ integrin
Vascular Smooth Muscle $\alpha_v\beta_3$ Integrin Mediates Arteriolar Vasodilation in Response to RGD Peptides, 821

Acetylcholine
Modulation of Endothelium-Dependent Hyperpolarization and Relaxation to Acetylcholine in Rat Mesenteric Artery by Cytochrome P450 Enzyme Activity, 827
Role of Endothelium-Derived Nitric Oxide in Coronary Vasodilatation Induced by Pacing Tachycardia in Humans, 331

Actin filament
Maximal Actomyosin ATPase Activity and In Vitro Myosin Motility Are Unaltered in Human Mitral Regurgitation Heart Failure, 222

α-actinin
Inhomogeneous Disappearance of Myofilament-Related Cytoskeletal Proteins in Stunned Myocardium of Guinea Pig, 447

Action potential
Ca^{2+} Influx During the Cardiac Action Potential in Guinea Pig Ventricular Myocytes, 194
Role of Ca^{2+}-Activated K^+ Channels in the Regulation of Membrane Potential and Tone of Smooth Muscle in Human Pial Arteries, 881

Action potential duration
Modulation of Ventricular Repolarization by a Premature Stimulus: Role of Epicardial Dispersion of Repolarization Kinetics Demonstrated by Optical Mapping of the Intact Guinea Pig Heart, 493

Action potential shortening
Simulation of Action Potentials From Metabolically Impaired Cardiac Myocytes: Role of ATP-Sensitive K^+ Current, 208

Adenosine receptor
PD 81,723, an Allosteric Enhancer of the A_1 Adenosine Receptor, Lowers the Threshold for Ischemic Preconditioning in Dogs, 415
Quantitative Relation Between Interstitial Adenosine Concentration and Coronary Blood Flow, 601

Adenovirus
Adhesion of Memory Lymphocytes to Vascular Cell Adhesion Molecule-1–Transduced Human Vascular Endothelial Cells Under Simulated Physiological Flow Conditions In Vitro, 1205
Endothelial Adhesion Molecules in Atherogenesis: A Concerto or a Solo?, 1216
Enhancer Stimulation Unmasks Latent Gene Transfer After Adenovirus-Mediated Gene Delivery Into Human Vascular Smooth Muscle Cells, 1188

Adhesion molecule
Adhesion of Memory Lymphocytes to Vascular Cell Adhesion Molecule-1–Transduced Human Vascular Endothelial Cells Under Simulated Physiological Flow Conditions In Vitro, 1205
Endothelial Adhesion Molecules in Atherogenesis: A Concerto or a Solo?, 1216
Heterogeneity of Expression of E- and P-Selectins In Vivo, 560

β-adrenergic receptor kinase
Activation of β-Adrenergic Receptor Kinase During Myocardial Ischemia, 455

Allosteric enhancers
PD 81,723, an Allosteric Enhancer of the A_1 Adenosine Receptor, Lowers the Threshold for Ischemic Preconditioning in Dogs, 415

Alternative splicing
Molecular Cloning and Characterization of Human Cardiac Homeobox Gene *CSX1*, 920

α-aminoisobutyric acid
Insulin Signaling and Its Regulation of System A Amino Acid Uptake in Cultured Rat Vascular Smooth Muscle Cells, 1167

Anatomic capillary diameter
Identification of Distinct Luminal Domains for Macromolecules, Erythrocytes, and Leukocytes Within Mammalian Capillaries, 581

Angiogenesis
Basic Fibroblast Growth Factor Increases Collateral Blood Flow in Rats With Femoral Arterial Ligation, 62
Molecular Mechanisms of Coronary Collateral Vessel Growth, 911

Angioplasty
In Vivo Collagen Turnover Following Experimental Balloon Angioplasty Injury and the Role of Matrix Metalloproteinases, 541
Expression of Inducible Nitric Oxide Synthase Inhibits Platelet Adhesion and Restores Blood Flow in the Injured Artery, 38
Upregulation of Basement Membrane–Degrading Metalloproteinase Secretion After Balloon Injury of Pig Carotid Arteries, 1177

Angiotensin II
Angiotensin II Type 2 Receptor–Mediated Regulation of Rat Neuronal K^+ Channels, 302
Angiotensin II Stimulates MAP Kinase Kinase Kinase Activity in Vascular Smooth Muscle Cells: Role of Raf, 1007
Effects of Intracellular Angiotensin II in Vascular Smooth Muscle Cells, 765
Mechanical Stretch Induces Enhanced Expression of Angiotensin II Receptor Subtypes in Neonatal Rat Cardiac Myocytes, 887

Angiotensin-converting enzyme
Monocyte- and Cytokine-Induced Downregulation of Angiotensin-Converting Enzyme in Cultured Human and Porcine Endothelial Cells, 512

Anisotropy
Anisotropic Activation Spread in Heart Cell Monolayers Assessed by High-Resolution Optical Mapping: Role of Tissue Discontinuities, 115

Antioxidant
Role of Reactive Oxygen Intermediates in Cytomegalovirus Gene Expression and in the Response of Human Smooth Muscle Cells to Viral Infection, 1143

Antisense oligonucleotide
Insulin-like Growth Factor II Induces DNA Synthesis in Fetal Ventricular Myocytes In Vitro, 716

Aorta
Prostacyclin Formation Elicited by Endothelin-1 in Rat Aorta Is Mediated via Phospholipase D Activation and Not Phospholipase C or A_2, 271

Aortocaval fistula
Sustained Increase in Aortic Endothelial Nitric Oxide Synthase Expression In Vivo in a Model of Chronic High Blood Flow, 857

Apoptosis
Apoptosis in Ischemic and Reperfused Rat Myocardium, 949
Tenascin-C Is Induced With Progressive Pulmonary Vascular Disease in Rats and Is Functionally Related to Increased Smooth Muscle Cell Proliferation, 1131

Arachidonic acid
Modulatory Effects of Arachidonic Acid on the Delayed Rectifier K^+ Current in Rat Pulmonary Arterial Myocytes: Structural Aspects and Involvement of Protein Kinase C, 20

Arg-Gly-Asp
Vascular Smooth Muscle $\alpha_v\beta_3$ Integrin Mediates Arteriolar Vasodilation in Response to RGD Peptides, 821

Arrhythmia
The Electrophysiological Mechanism of Ventricular Arrhythmias in the Long QT Syndrome: Tridimensional Mapping of Activation and Recovery Patterns, 474

Arterial growth
Wall Remodeling During Luminal Expansion of Mesenteric Arterial Collaterals in the Rat, 1015

Arterial injury
Differential Expression of α_1 Type VIII Collagen in Injured Platelet-Derived Growth Factor-BB–Stimulated Rat Carotid Arteries, 524

Arterioles
Muscle Length Directs Sympathetic Nerve Activity and Vasomotor Tone in Resistance Vessels of Hamster Retractor, 551

Atherosclerosis
Adhesion of Memory Lymphocytes to Vascular Cell Adhesion Molecule-1–Transduced Human Vascular Endothelial Cells Under Simulated Physiological Flow Conditions In Vitro, 1205
Effects of Pressure-Induced Stretch and Convection on Low-Density Lipoprotein and Albumin Uptake in the Rabbit Aortic Wall, 532
Endothelin Peptide and Receptors in Human Atherosclerotic Coronary Artery and Aorta, 794
Mildly Oxidized LDL Evokes a Sustained Ca^{2+}-Dependent Retraction of Vascular Smooth Muscle Cells, 871
Oxygen-Derived Free Radicals Contribute to Baroreceptor Dysfunction in Atherosclerotic Rabbits, 802
Role of Reactive Oxygen Intermediates in Cytomegalovirus Gene Expression and in the Response of Human Smooth Muscle Cells to Viral Infection, 1143
Thrombin Potently Stimulates Cytokine Production in Human Vascular Smooth Muscle Cells but Not in Mononuclear Phagocytes, 286

ATP-regulated channels
Simulation of Action Potentials From Metabolically Impaired Cardiac Myocytes: Role of ATP-Sensitive K^+ Current, 208

ATP-sensitive K^+ channel
PD 81,723, an Allosteric Enhancer of the A_1 Adenosine Receptor, Lowers the Threshold for Ischemic Preconditioning in Dogs, 415
Protein Kinase C–Induced Changes in the Stoichiometry of ATP Binding Activate Cardiac ATP-Sensitive K^+ Channels: A Possible Mechanistic Link to Ischemic Preconditioning, 399

Autonomic nervous system
Nitric Oxide and Cardiac Function, 363

B

Balloon angioplasty
Overexpression of Tissue Inhibitor of Matrix Metalloproteinase-1 Inhibits Vascular Smooth Muscle Cell Functions In Vitro and In Vivo, 812

Baroreceptors
Oxygen-Derived Free Radicals Contribute to Baroreceptor Dysfunction in Atherosclerotic Rabbits, 802

BCECF
Role of an Electrogenic Na^+-HCO_3^- Cotransport in Determining Myocardial pH_i After an Increase in Heart Rate, 698

Binary
Conditional Transgene Expression in the Heart, 691

Biopsy
Maximal Actomyosin ATPase Activity and In Vitro Myosin Motility Are Unaltered in Human Mitral Regurgitation Heart Failure, 222

Blood flow
Expression of Inducible Nitric Oxide Synthase Inhibits Platelet Adhesion and Restores Blood Flow in the Injured Artery, 38

Blood vessels
cAMP-Mediated Vascular Protection in an Orthotopic Rat Lung Transplant Model: Insights Into the Mechanism of Action of Prostaglandin E_1 to Improve Lung Preservation, 773

Bovine vascular smooth muscle cells
The Fumagillin Analogue TNP-470 Inhibits DNA Synthesis of Vascular Smooth Muscle Cells Stimulated by Platelet-Derived Growth Factor and Insulin-like Growth Factor-I: Possible Involvement of Cyclin-Dependent Kinase 2, 757

Bradykinin
Role of Endothelium-Derived Nitric Oxide in the Modulation of Canine Myocardial Mitochondrial Respiration In Vitro: Implications for the Development of Heart Failure, 381
Selectively Enhanced Cellular Signaling by G_i Proteins in Essential Hypertension: $G\alpha_{i2}$, $G\alpha_{i3}$, and $G\beta_2$ Are Not Mutated, 974

Bright-field microscopy
Identification of Distinct Luminal Domains for Macromolecules, Erythrocytes, and Leukocytes Within Mammalian Capillaries, 581

C

Ca^{2+}
Exogenously Administered Growth Hormone and Insulin-like Growth Factor-I Alter Intracellular Ca^{2+} Handling and Enhance Cardiac Performance: In Vitro Evaluation in the Isolated Isovolumic Buffer–Perfused Rat Heart, 227
Mildly Oxidized LDL Evokes a Sustained Ca^{2+}-Dependent Retraction of Vascular Smooth Muscle Cells, 871
Phosphorylation of Endothelial Nitric Oxide Synthase in Response to Fluid Shear Stress, 984
Spontaneous Ca^{2+} Oscillations and Waves in Pulmonary Vascular Endothelial Cells, 909

Ca^{2+} channel
Cell Cycle–Dependent Expression of L- and T-Type Ca^{2+} Currents in Rat Aortic Smooth Muscle Cells in Primary Culture, 14

Ca^{2+} current
A Cellular Mechanism Contributing to Postvagal Tachycardia Studied in Isolated Pacemaker Cells From Cat Right Atrium, 109

Ca^{2+} oscillation
Ca^{2+} Waves in Lung Capillary Endothelium, 898
Spontaneous Ca^{2+} Oscillations and Waves in Pulmonary Vascular Endothelial Cells, 909

Ca^{2+} stores
Compensatory Mechanisms Associated With the Hyperdynamic Function of Phospholamban-Deficient Mouse Hearts, 1064
Spontaneous Ca^{2+} Oscillations and Waves in Pulmonary Vascular Endothelial Cells, 909

Ca^{2+} transient
Activation of Purinergic Receptors Triggers Oscillatory Contractions in Adult Rat Ventricular Myocytes, 94
Molecular and Functional Identification of m_1 Muscarinic Acetylcholine Receptors in Rat Ventricular Myocytes, 86

Ca^{2+}-activated K^+ channels
Role of Ca^{2+}-Activated K^+ Channels in the Regulation of Membrane Potential and Tone of Smooth Muscle in Human Pial Arteries, 881

Ca^{2+}-induced Ca^{2+} release
Cyclic ADP-Ribose Does Not Regulate Sarcoplasmic Reticulum Ca^{2+} Release in Intact Cardiac Myocytes, 147

$[Ca^{2+}]_i$
Alterations in Rat Interlobar Artery Membrane Potential and K^+ Channels in Genetic and Nongenetic Hypertension, 295

Calpain
Inhomogeneous Disappearance of Myofilament-Related Cytoskeletal Proteins in Stunned Myocardium of Guinea Pig, 447

Calpain inhibitor I
Inhomogeneous Disappearance of Myofilament-Related Cytoskeletal Proteins in Stunned Myocardium of Guinea Pig, 447

cAMP
A Cellular Mechanism Contributing to Postvagal Tachycardia Studied in Isolated Pacemaker Cells From Cat Right Atrium, 109
cAMP-Mediated Vascular Protection in an Orthotopic Rat Lung Transplant Model: Insights Into the Mechanism of Action of Prostaglandin E_1 to Improve Lung Preservation, 773

Carbachol
Molecular and Functional Identification of m_1 Muscarinic Acetylcholine Receptors in Rat Ventricular Myocytes, 86

Carbon-13 nuclear magnetic resonance
Attenuated Glycogenolysis Reduces Glycolytic Catabolite Accumulation During Ischemia in Preconditioned Rat Hearts, 435

Cardiac action potential
Developmental Changes in the Delayed Rectifier K^+ Channels in Mouse Heart, 79

Cardiac contractility
Phospholamban: A Prominent Regulator of Myocardial Contractility, 1059

Cardiac development
Molecular Cloning and Characterization of Human Cardiac Homeobox Gene *CSX1*, 920

Cardiac dysfunction
Role of Endothelium-Derived Nitric Oxide in the Modulation of Canine Myocardial Mitochondrial Respiration In Vitro: Implications for the Development of Heart Failure, 381

Cardiac hypertrophy
Differential Expression of Voltage-Gated K^+ Channel Genes in Left Ventricular Remodeled Myocardium After Experimental Myocardial Infarction, 669
Effects of FK-506 on Contraction and Ca^{2+} Transients in Rat Cardiac Myocites, 1110
Mechanical Stretch Induces Enhanced Expression of Angiotensin II Receptor Subtypes in Neonatal Rat Cardiac Myocytes, 887

Cardiac muscle
Effects of FK-506 on Contraction and Ca^{2+} Transients in Rat Cardiac Myocytes, 1110
Maximal Actomyosin ATPase Activity and In Vitro Myosin Motility Are Unaltered in Human Mitral Regurgitation Heart Failure, 222
Role of the Kv4.3 K^+ Channel in Ventricular Muscle: A Molecular Correlate for the Transient Outward Current, 659

Cardiac myocyte
Distribution of cAMP-Activated Chloride Current and CFTR mRNA in the Guinea Pig Heart, 201
Mechanical Stretch Induces Enhanced Expression of Angiotensin II Receptor Subtypes in Neonatal Rat Cardiac Myocytes, 881
Thyroid Hormone Represses Protein Kinase C Isoform Expression and Activity in Rat Cardiac Myocytes, 388
Titin Develops Restoring Force in Rat Cardiac Myocytes, 619

Cardiac ventricular myocytes
Protein Kinase C–Induced Changes in the Stoichiometry of ATP Binding Activate Cardiac ATP-Sensitive K^+ Channels: A Possible Mechanistic Link to Ischemic Preconditioning, 399

Cardiac-specific gene expression
Factors Involved in Cardiogenesis and the Regulation of Cardiac-Specific Gene Expression, 4
Molecular Cloning and Characterization of Human Cardiac Homeobox Gene *CSX1*, 920

Cardiogenesis
Factors Involved in Cardiogenesis and the Regulation of Cardiac-Specific Gene Expression, 4

Cardiomyocyte (see Cardiac myocyte)

Cardiomyocyte coupling
Fibroblast Growth Factor-2 Decreases Metabolic Coupling and Stimulates Phosphorylation as Well as Masking of Connexin43 Epitopes in Cardiac Myocytes, 647

Cardiomyopathy
Maximal Actomyosin ATPase Activity and In Vitro Myosin Motility Are Unaltered in Human Mitral Regurgitation Heart Failure, 222

Cardiovascular development
In Vivo Assessment of Embryonic Cardiovascular Dimensions and Function in Day-10.5 to -14.5 Mouse Embryos, 247

Carotid sinus
Oxygen-Derived Free Radicals Contribute to Baroreceptor Dysfunction in Atherosclerotic Rabbits, 802

Catalase
Oxygen-Derived Free Radicals Contribute to Baroreceptor Dysfunction in Atherosclerotic Rabbits, 802

Cell culture
Anisotropic Activation Spread in Heart Cell Monolayers Assessed by High-Resolution Optical Mapping: Role of Tissue Discontinuities, 115
Spatial Changes in Transmembrane Potential During Extracellular Electrical Shocks in Cultured Monolayers of Neonatal Rat Ventricular Myocytes, 676

Cell death
Ceramide Is Not a Signal for Tumor Necrosis Factor–Induced Gene Expression but Does Cause Programmed Cell Death in Human Vascular Endothelial Cells, 736

Cell proliferation
Tenascin-C Is Induced With Progressive Pulmonary Vascular Disease in Rats and Is Functionally Related to Increased Smooth Muscle Cell Proliferation, 1131
Upregulation of Basement Membrane–Degrading Metalloproteinase Secretion After Balloon Injury of Pig Carotid Arteries, 1177

Cellular coupling resistance
Intracellular Ca^{2+}, Intercellular Electrical Coupling, and Mechanical Activity in Ischemic Rabbit Papillary Muscle: Effects of Preconditioning and Metabolic Blockade, 237

Ceramide
Ceramide Is Not a Signal for Tumor Necrosis Factor–Induced Gene Expression but Does Cause Programmed Cell Death in Human Vascular Endothelial Cells, 736

CFTR
Distribution of cAMP-Activated Chloride Current and CFTR mRNA in the Guinea Pig Heart, 201

cGMP
Role of Endothelium-Derived Nitric Oxide in the Modulation of Canine Myocardial Mitochondrial Respiration In Vitro: Implications for the Development of Heart Failure, 381
Vasoactive Substances Regulate Vascular Smooth Muscle Cell Apoptosis: Countervailing Influences of Nitric Oxide and Angiotensin II, 748

Charybdotoxin
Role of Ca^{2+}-Activated K^+ Channels in the Regulation of Membrane Potential and Tone of Smooth Muscle in Human Pial Arteries, 881

Choroid
Increased Nitric Oxide Synthesis and Action Preclude Choroidal Vasoconstriction to Hyperoxia in Newborn Pigs, 504

c-Jun N-terminal kinase
Stimulation of the Stress-Activated Mitogen-Activated Protein Kinase Subfamilies in Perfused Heart: p38/RK Mitogen-Activated Protein Kinases and c-Jun N-Terminal Kinases Are Activated by Ischemia/Reperfusion, 162

Cl^- channel
Distribution of cAMP-Activated Chloride Current and CFTR mRNA in the Guinea Pig Heart, 201

Collagen
Anisotropic Activation Spread in Heart Cell Monolayers Assessed by High-Resolution Optical Mapping: Role of Tissue Discontinuities, 115
In Vivo Collagen Turnover Following Experimental Balloon Angioplasty Injury and the Role of Matrix Metalloproteinases, 541

Collagen degradation
Vascular Smooth Muscle $\alpha_v\beta_3$ Integrin Mediates Arteriolar Vasodilation in Response to RGD Peptides, 821

Collateral arteries
Molecular Mechanisms of Coronary Collateral Vessel Growth, 911

Competitive RT-PCR
Distribution of cAMP-Activated Chloride Current and CFTR mRNA in the Guinea Pig Heart, 201

Computer model
Simulation of Action Potentials From Metabolically Impaired Cardiac Myocytes: Role of ATP-Sensitive K^+ Current, 208

Conditional
Conditional Transgene Expression in the Heart, 691

Conduction system
Expression of mRNAs for Neurotrophins and Their Receptors in Developing Rat Heart, 930

Congenital heart disease
Lidocaine Block of LQT-3 Mutant Human Na^+ Channels, 103

Connexin
Functional and Structural Assessment of Intercellular Communication: Increased Conduction Velocity and Enhanced Connexin Expression in Dibutyryl cAMP–Treated Cultured Cardiac Myocytes, 174

Connexin43
Fibroblast Growth Factor-2 Decreases Metabolic Coupling and Stimulates Phosphorylation as Well as Masking of Connexin43 Epitopes in Cardiac Myocytes, 647

Conscious dog
Coronary and Systemic Hemodynamic Effects of Sustained Inhibition of Nitric Oxide Synthesis in Conscious Dogs: Evidence for Cross Talk Between Nitric Oxide and Cyclooxygenase in Coronary Vessels, 343

Contractile function
Time Course of Late Preconditioning Against Myocardial Stunning in Conscious Pigs, 424

Contraction
An Improved Permeabilization Protocol for the Introduction of Peptides Into Cardiac Myocytes: Application to Protein Kinase C Research, 1086

Contracture
Intracellular Ca^{2+}, Intercellular Electrical Coupling, and Mechanical Activity in Ischemic Rabbit Papillary Muscle: Effects of Preconditioning and Metabolic Blockade, 237

Convection
Effects of Pressure-Induced Stretch and Convection on Low-Density Lipoprotein and Albumin Uptake in the Rabbit Aortic Wall, 532

Coronary arteriole
Vasodilatory Effect of Pulsatile Pressure on Coronary Resistance Vessels, 1039

Coronary artery
Binding of the Novel Nonxanthine A_{2A} Adenosine Receptor Antagonist [^{3}H]SCH58261 to Coronary Artery Membranes, 1153
Gender Differences in Coronary Artery Diameter Involve Estrogen, Nitric Oxide, and Ca^{2+}-Dependent K^+ Channels, 1024

Coronary circulation
Coronary and Systemic Hemodynamic Effects of Sustained Inhibition of Nitric Oxide Synthesis in Conscious Dogs: Evidence for Cross Talk Between Nitric Oxide and Cyclooxygenase in Coronary Vessels, 343
Role of Endothelium-Derived Nitric Oxide in Coronary Vasodilatation Induced by Pacing Tachycardia in Humans, 331

Coronary flow
Pulse Pressure-Related Changes in Coronary Flow In Vivo Are Modulated by Nitric Oxide and Adenosine, 849

Coronary resistance
Function and Production of Nitric Oxide in the Coronary Circulation of the Conscious Dog During Exercise, 840

Crossbridge
Maximal Actomyosin ATPase Activity and In Vitro Myosin Motility Are Unaltered in Human Mitral Regurgitation Heart Failure, 222

Cycle length
Linearity of Pulsatile Pressure-Flow Relations in the Embryonic Chick Vascular System, 864

Cyclic ADP-ribose
Cyclic ADP-Ribose Does Not Regulate Sarcoplasmic Reticulum Ca^{2+} Release in Intact Cardiac Myocytes, 147

Cyclin-dependent kinase 2
The Fumagillin Analogue TNP-470 Inhibits DNA Synthesis of Vascular Smooth Muscle Cells Stimulated by Platelet-Derived Growth Factor and Insulin-like Growth Factor-I: Possible Involvement of Cyclin-Dependent Kinase 2, 757

Cyclooxygenase
Coronary and Systemic Hemodynamic Effects of Sustained Inhibition of Nitric Oxide Synthesis in Conscious Dogs: Evidence for Cross Talk Between Nitric Oxide and Cyclooxygenase in Coronary Vessels, 343
Increased Nitric Oxide Synthesis and Action Preclude Choroidal Vasoconstriction to Hyperoxia in Newborn Pigs, 504

Cytochrome P450
Functional Implications of a Newly Characterized Pathway of 11,12-Epoxyeicosatrienoic Acid Metabolism in Arterial Smooth Muscle, 784
Identification of a Putative Microvascular Oxygen Sensor, 54
Modulation of Endothelium-Dependent Hyperpolarization and Relaxation to Acetylcholine in Rat Mesenteric Artery by Cytochrome P450 Enzyme Activity, 827

Cytomegalovirus
Role of Reactive Oxygen Intermediates in Cytomegalovirus Gene Expression and in the Response of Human Smooth Muscle Cells to Viral Infection, 1143

Cytosolic Ca^{2+}
Effects of Intracellular Angiotensin II in Vascular Smooth Muscle Cells, 765

D

Defibrillation
Shock-Induced Depolarization of Refractory Myocardium Prevents Wave-Front Propagation in Defibrillation, 957
Spatial Changes in Transmembrane Potential During Extracellular Electrical Shocks in Cultured Monolayers of Neonatal Rat Ventricular Myocytes, 676

Delayed rectifier current/channel
Developmental Changes in the Delayed Rectifier K^+ Channels in Mouse Heart, 79

Density-enhanced phosphatase
Cloning and Characterization of Rat Density-Enhanced Phosphatase-1, a Protein Tyrosine Phosphatase Expressed by Vascular Cells, 570

Desmin
Inhomogeneous Disappearance of Myofilament-Related Cytoskeletal Proteins in Stunned Myocardium of Guinea Pig, 447

Development
Developmental Changes in the Delayed Rectifier K^+ Channels in Mouse Heart, 79

Dexamethasone
Heparin-Binding Epidermal Growth Factor–Like Growth Factor Regulates Fibroblast Growth Factor-2 Expression in Aortic Smooth Muscle Cells, 263

Diastolic recoil
Titin Develops Restoring Force in Rat Cardiac Myocytes, 619

Dihydroxyeicosatrienoic acid
Functional Implications of a Newly Characterized Pathway of 11,12-Epoxyeicosatrienoic Acid Metabolism in Arterial Smooth Muscle, 784

Dose response
Quantitative Relation Between Interstitial Adenosine Concentration and Coronary Blood Flow, 601

Downey hypothesis
Role of Protein Kinase C in Ischemic Preconditioning: Player or Spectator?, 627

E

Early afterdepolarization
The Electrophysiological Mechanism of Ventricular Arrhythmias in the Long QT Syndrome: Tridimensional Mapping of Activation and Recovery Patterns, 474

Editorial
Endothelial Adhesion Molecules in Atherogenesis, 1216
Mechanical Strain in Differentiation of Vascular SMCs, 1054
Role of PKC in Ischemic Preconditioning: Player or Spectator?, 627
Second Term for the Editors, 1
Spontaneous Ca^{2+} Oscillations and Waves in Pulmonary Vascular ECs, 909

Electrical shock
Spatial Changes in Transmembrane Potential During Extracellular Electrical Shocks in Cultured Monolayers of Neonatal Rat Ventricular Myocytes, 676

Embryonic heart
Expression of mRNAs for Neurotrophins and Their Receptors in Developing Rat Heart, 930

Embryonic hemoglobin
Disruption of Hemoglobin Oxygen Transport Does Not Impact Oxygen-Dependent Physiological Processes in Developing Embryos of Zebra Fish (*Danio rerio*), 358

Embryonic impedance
Linearity of Pulsatile Pressure-Flow Relations in the Embryonic Chick Vascular System, 864

Endothelial cells
Fluid Flow Rapidly Activates G Proteins in Human Endothelial Cells: Involvement of G Proteins in Mechanochemical Signal Transduction, 834
MAP Kinase Activation by Flow in Endothelial Cells: Role of $\beta 1$ Integrins and Tyrosine Kinases, 310

Endothelial nitric oxide synthase
Depression of Endothelial Nitric Oxide Synthase but Increased Expression of Endothelin-1 Immunoreactivity in Rat Thoracic Aortic Endothelium Associated With Long-term, but Not Short-term, Sympathectomy, 317
Nitric Oxide and Cardiac Function, 363

Endothelin
Adhesion of Memory Lymphocytes to Vascular Cell Adhesion Molecule-1–Transduced Human Vascular Endothelial Cells Under Simulated Physiological Flow Conditions In Vitro, 1205
Endothelin Peptide and Receptors in Human Atherosclerotic Coronary Artery and Aorta, 794
Prostacyclin Formation Elicited by Endothelin-1 in Rat Aorta Is Mediated via Phospholipase D Activation and Not Phospholipase C or A_2, 271

Endothelin A
Endothelin Peptide and Receptors in Human Atherosclerotic Coronary Artery and Aorta, 794

Endothelin B
Endothelin Peptide and Receptors in Human Atherosclerotic Coronary Artery and Aorta, 794

Endothelin-1
Depression of Endothelial Nitric Oxide Synthase but Increased Expression of Endothelin-1 Immunoreactivity in Rat Thoracic Aortic Endothelium Associated With Long-term, but Not Short-term, Sympathectomy, 317

Endothelium
A Balance Between Nitric Oxide and Oxidants Regulates Mast Cell–Dependent Neutrophil–Endothelial Cell Interactions, 992
Acute Reductions in Blood Flow and Shear Stress Induce Platelet-Derived Growth Factor-A Expression in Baboon Prosthetic Grafts, 45
Adhesion of Memory Lymphocytes to Vascular Cell Adhesion Molecule-1–Transduced Human Vascular Endothelial Cells Under Simulated Physiological Flow Conditions In Vitro, 1205
Ca^{2+} Waves in Lung Capillary Endothelium, 898
Characterization of the Endothelium-Specific Murine Vascular Endothelial Growth Factor Receptor-2 (Flk-1) Promoter, 277
Depression of Endothelial Nitric Oxide Synthase but Increased Expression of Endothelin-1 Immunoreactivity in Rat Thoracic Aortic Endothelium Associated With Long-term, but Not Short-term, Sympathectomy, 317
Heterogeneity of Expression of E- and P-Selectins In Vivo, 560
Macromolecular Composition of Stress Fiber–Plasma Membrane Attachment Sites in Endothelial Cells In Situ, 1000
Pulse Pressure-Related Changes in Coronary Flow In Vivo Are Modulated by Nitric Oxide and Adenosine, 849
Shear Stress Modulates Expression of Cu/Zn Superoxide Dismutase in Human Aortic Endothelial Cells, 32
Wall Remodeling During Luminal Expansion of Mesenteric Arterial Collaterals in the Rat, 1015

Endothelium-derived hyperpolarizing factor
Modulation of Endothelium-Dependent Hyperpolarization and Relaxation to Acetylcholine in Rat Mesenteric Artery by Cytochrome P450 Enzyme Activity, 827

Endothelium-derived relaxing factor
Function and Production of Nitric Oxide in the Coronary Circulation of the Conscious Dog During Exercise, 840
Phosphorylation of Endothelial Nitric Oxide Synthase in Response to Fluid Shear Stress, 984
Role of Endothelium-Derived Nitric Oxide in Coronary Vasodilatation Induced by Pacing Tachycardia in Humans, 331

Enhancer stimulation
Enhancer Stimulation Unmasks Latent Gene Transfer After Adenovirus-Mediated Gene Delivery Into Human Vascular Smooth Muscle Cells, 1188

Epoxyeicosatrienoic acid
Functional Implications of a Newly Characterized Pathway of 11,12-Epoxyeicosatrienoic Acid Metabolism in Arterial Smooth Muscle, 784

Estrogen
Gender Differences in Coronary Artery Diameter Involve Estrogen, Nitric Oxide, and Ca^{2+}-Dependent K^+ Channels, 1024

Evolution
Molecular Cloning and Characterization of Human Cardiac Homeobox Gene *CSX1*, 920

Excitation-contraction coupling
Regulation of Cardiac Ca^{2+} Release Channel (Ryanodine Receptor) by Ca^{2+}, H^+, Mg^{2+}, and Adenine Nucleotides Under Normal and Simulated Ischemic Conditions, 1100

Extracellular matrix
Differential Expression of α_1 Type VIII Collagen in Injured Platelet-Derived Growth Factor-BB–Stimulated Rat Carotid Arteries, 524
Mechanical Strain Increases Smooth Muscle and Decreases Nonmuscle Myosin Expression in Rat Vascular Smooth Muscle Cells, 1046
Pressure and Angiotensin II Synergistically Induce Aortic Fibronectin Expression in Organ Culture Model of Rabbit Aorta: Evidence for a Pressure-Induced Tissue Renin-Angiotensin System, 70
Tenascin-C Is Induced With Progressive Pulmonary Vascular Disease in Rats and Is Functionally Related to Increased Smooth Muscle Cell Proliferation, 1131

F

Factor Xa
Biochemical and Pharmacological Properties of SANORG 32701: Comparison With the 'Synthetic Pentasaccharide' (SR 90107/ORG 31540) and Standard Heparin, 590

Fatty acid oxidation
Cardiac Efficiency Is Improved After Ischemia by Altering Both the Source and Fate of Protons, 940

Feed arteries
Muscle Length Directs Sympathetic Nerve Activity and Vasomotor Tone in Resistance Vessels of Hamster Retractor, 551

Fiber types
Heart Failure in Rats Causes Changes in Skeletal Muscle Morphology and Gene Expression That Are Not Explained by Reduced Activity, 128

Fibroblast growth factor
Fibroblast Growth Factor-2 Decreases Metabolic Coupling and Stimulates Phosphorylation as Well as Masking of Connexin43 Epitopes in Cardiac Myocytes, 647
Heparin-Binding Epidermal Growth Factor–Like Growth Factor Regulates Fibroblast Growth Factor-2 Expression in Aortic Smooth Muscle Cells, 263

Fibroblasts
Selectively Enhanced Cellular Signaling by G_i Proteins in Essential Hypertension: $G\alpha_{i2}$, $G\alpha_{i3}$, and $G\beta_2$ Are Not Mutated, 974

FK-506
Effects of FK-506 on Contraction and Ca^{2+} Transients in Rat Cardiac Myocytes, 1110

Flk-1
Characterization of the Endothelium-Specific Murine Vascular Endothelial Growth Factor Receptor-2 (Flk-1) Promoter, 277

Fluorescence microscopy
Identification of Distinct Luminal Domains for Macromolecules, Erythrocytes, and Leukocytes Within Mammalian Capillaries, 581

Focal adhesion
Macromolecular Composition of Stress Fiber–Plasma Membrane Attachment Sites in Endothelial Cells In Situ, 1000

Fracture energy
Variation in the Velocity, Deformation, and Adhesion Energy Density of Leukocytes Rolling Within Venules, 1122

Frequency domain
Linearity of Pulsatile Pressure-Flow Relations in the Embryonic Chick Vascular System, 864

Functional capillary diameter
Identification of Distinct Luminal Domains for Macromolecules, Erythrocytes, and Leukocytes Within Mammalian Capillaries, 581

Fura 2
Spontaneous Ca^{2+} Oscillations and Waves in Pulmonary Vascular Endothelial Cells

G

G protein
Fluid Flow Rapidly Activates G Proteins in Human Endothelial Cells: Involvement of G Proteins in Mechanochemical Signal Transduction, 834

Gap junction
Effects of Intracellular Angiotensin II in Vascular Smooth Muscle Cells, 765
Functional and Structural Assessment of Intercellular Communication: Increased Conduction Velocity and Enhanced Connexin Expression in Dibutyryl cAMP–Treated Cultured Cardiac Myocytes, 174
Gap Junctions in Vascular Tissues: Evaluating the Role of Intercellular Communication in the Modulation of Vasomotor Tone, 631
Triggered Propagated Contractions in Rat Cardiac Trabeculae: Inhibition by Octanol and Heptanol, 1077

Gelatinase
In Vivo Collagen Turnover Following Experimental Balloon Angioplasty Injury and the Role of Matrix Metalloproteinases, 541

Gene expression
Enhancer Stimulation Unmasks Latent Gene Transfer After Adenovirus-Mediated Gene Delivery Into Human Vascular Smooth Muscle Cells, 1188
Heart Failure in Rats Causes Changes in Skeletal Muscle Morphology and Gene Expression That Are Not Explained by Reduced Activity, 128
Sustained Increase in Aortic Endothelial Nitric Oxide Synthase Expression In Vivo in a Model of Chronic High Blood Flow, 857

Gene targeting
Distinct Phenotype of E-Selectin–Deficient Mice: E-Selectin Is Required for Slow Leukocyte Rolling In Vivo, 1196

Gene therapy
Overexpression of Tissue Inhibitor of Matrix Metalloproteinase-1 Inhibits Vascular Smooth Muscle Cell Functions In Vitro and In Vivo, 812

Gene transfer
Enhancer Stimulation Unmasks Latent Gene Transfer After Adenovirus-Mediated Gene Delivery Into Human Vascular Smooth Muscle Cells, 1188

Glibenclamide
PD 81,723, an Allosteric Enhancer of the A_1 Adenosine Receptor, Lowers the Threshold for Ischemic Preconditioning in Dogs, 415

Glomerular filtration rate
Prostaglandins Maintain Renal Vasodilation and Hyperfiltration During Chronic Nitric Oxide Synthase Blockade in Conscious Pregnant Rats, 1161

Glucose oxidation
Cardiac Efficiency Is Improved After Ischemia by Altering Both the Source and Fate of Protons, 940

Glycogen
Attenuated Glycogenolysis Reduces Glycolytic Catabolite Accumulation During Ischemia in Preconditioned Rat Hearts, 435

Glycolysis
Attenuated Glycogenolysis Reduces Glycolytic Catabolite Accumulation During Ischemia in Preconditioned Rat Hearts, 435
Cardiac Efficiency Is Improved After Ischemia by Altering Both the Source and Fate of Protons, 940

Guanylate cyclase
Vasoactive Substances Regulate Vascular Smooth Muscle Cell Apoptosis: Countervailing Influences of Nitric Oxide and Angiotensin II, 748

Guinea pig
Distribution of cAMP-Activated Chloride Current and CFTR mRNA in the Guinea Pig Heart, 201

H

Hamster cremaster muscle
Identification of Distinct Luminal Domains for Macromolecules, Erythrocytes, and Leukocytes Within Mammalian Capillaries, 581

Heart
Ca^{2+} Influx During the Cardiac Action Potential in Guinea Pig Ventricular Myocytes, 194
Conditional Transgene Expression in the Heart, 691
Molecular Mechanisms of Coronary Collateral Vessel Growth, 911
Quantitative Relation Between Interstitial Adenosine Concentration and Coronary Blood Flow, 601
Thrombin Activates the Sarcolemmal Na^+-H^+ Exchanger: Evidence for a Receptor-Mediated Mechanism Involving Protein Kinase C, 705

Heart failure
Heart Failure in Rats Causes Changes in Skeletal Muscle Morphology and Gene Expression That Are Not Explained by Reduced Activity, 128
Nitric Oxide and Cardiac Function, 363
Protein Kinase C Isoform Expression in Normal and Failing Rabbit Hearts, 153

Heart rate
Role of an Electrogenic Na^+-HCO_3^- Cotransport in Determining Myocardial pH_i After an Increase in Heart Rate, 698

Hemodynamics
Acute Reductions in Blood Flow and Shear Stress Induce Platelet-Derived Growth Factor-A Expression in Baboon Prosthetic Grafts, 45
Shear Stress Modulates Expression of Cu/Zn Superoxide Dismutase in Human Aortic Endothelial Cells, 32

Hemoglobin
Disruption of Hemoglobin Oxygen Transport Does Not Impact Oxygen-Dependent Physiological Processes in Developing Embryos of Zebra Fish (*Danio rerio*), 358

Heparin
Heparin-Binding Epidermal Growth Factor–Like Growth Factor Regulates Fibroblast Growth Factor-2 Expression in Aortic Smooth Muscle Cells, 263

Heparin-binding epidermal growth factor–like growth factor
Heparin-Binding Epidermal Growth Factor–Like Growth Factor Regulates Fibroblast Growth Factor-2 Expression in Aortic Smooth Muscle Cells, 263

Heptanol
Triggered Propagated Contractions in Rat Cardiac Trabeculae: Inhibition by Octanol and Heptanol, 1077

Histamine
Ca^{2+} Waves in Lung Capillary Endothelium, 898

Human artery
Endothelin Peptide and Receptors in Human Atherosclerotic Coronary Artery and Aorta, 794

Human cerebral arteries
Role of Ca^{2+}-Activated K^+ Channels in The Regulation of Membrane Potential and Tone of Smooth Muscle in Human Pial Arteries, 881

Hyperoxia
Increased Nitric Oxide Synthesis and Action Preclude Choroidal Vasoconstriction to Hyperoxia in Newborn Pigs, 504

Hyperplasia
Wall Remodeling During Luminal Expansion of Mesenteric Arterial Collaterals in the Rat, 1015

Hypertension
Alterations in Rat Interlobar Artery Membrane Potential and K^+ Channels in Genetic and Nongenetic Hypertension, 295

Pressure and Angiotensin II Synergistically Induce Aortic Fibronectin Expression in Organ Culture Model of Rabbit Aorta: Evidence for a Pressure-Induced Tissue Renin-Angiotensin System, 70

Hyperthyroidism
Effects of Thyroid Hormone on Left Ventricular Performance and Regulation of Contractile and Ca^{2+}-Cycling Proteins in the Baboon: Implications for the Force-Frequency and Relaxation-Frequency Relationships, 727

Hypertrophy
An Improved Permeabilization Protocol for the Introduction of Peptides Into Cardiac Myocytes: Application to Protein Kinase C Research, 1086
Cellular and Ionic Basis of Arrhythmias in Postinfarction Remodeled Ventricular Myocardium, 461
Insulin-like Growth Factor II Induces DNA Synthesis in Fetal Ventricular Myocytes In Vitro, 716

I

I_{Ca}
Ca^{2+} Influx During the Cardiac Action Potential in Guinea Pig Ventricular Myocytes, 194

Immunohistochemistry
Acute Reductions in Blood Flow and Shear Stress Induce Platelet-Derived Growth Factor-A Expression in Baboon Prosthetic Grafts, 45

In situ hybridization
Acute Reductions in Blood Flow and Shear Stress Induce Platelet-Derived Growth Factor-A Expression in Baboon Prosthetic Grafts, 45
Expression of mRNAs for Neurotrophins and Their Receptors in Developing Rat Heart, 930

Inducible nitric oxide synthase
Nitric Oxide and Cardiac Function, 363

Inflammation
Distinct Phenotype of E-Selectin–Deficient Mice: E-Selectin Is Required for Slow Leukocyte Rolling In Vivo, 1196
Heterogeneity of Expression of E- and P-Selectins In Vivo, 560
Thrombin Potently Stimulates Cytokine Production in Human Vascular Smooth Muscle Cells but Not in Mononuclear Phagocytes, 286

Instantaneous rolling velocity
Variation in the Velocity, Deformation, and Adhesion Energy Density of Leukocytes Rolling Within Venules, 1122

Insulin
Insulin Signaling and Its Regulation of System A Amino Acid Uptake in Cultured Rat Vascular Smooth Muscle Cells, 1167

Insulin-like growth factor-I
Exogenously Administered Growth Hormone and Insulin-like Growth Factor-I Alter Intracellular Ca^{2+} Handling and Enhance Cardiac Performance: In Vitro Evaluation in the Isolated Isovolumic Buffer–Perfused Rat Heart, 227
The Fumagillin Analogue TNP-470 Inhibits DNA Synthesis of Vascular Smooth Muscle Cells Stimulated by Platelet-Derived Growth Factor and Insulin-like Growth Factor-I: Possible Involvement of Cyclin-Dependent Kinase 2, 757

Insulin-like growth factor-II
Insulin-like Growth Factor II Induces DNA Synthesis in Fetal Ventricular Myocytes In Vitro, 716

Integrins
A Balance Between Nitric Oxide and Oxidants Regulates Mast Cell–Dependent Neutrophil–Endothelial Cell Interactions, 992

Intercellular communication
Functional and Structural Assessment of Intercellular Communication: Increased Conduction Velocity and Enhanced Connexin Expression in Dibutyryl cAMP–Treated Cultured Cardiac Myocytes, 174
Gap Junctions in Vascular Tissues: Evaluating the Role of Intercellular Communication in the Modulation of Vasomotor Tone, 631

Interleukin-1
Monocyte- and Cytokine-Induced Downregulation of Angiotensin-Converting Enzyme in Cultured Human and Porcine Endothelial Cells, 512

Intermittent claudication
Basic Fibroblast Growth Factor Increases Collateral Blood Flow in Rats With Femoral Arterial Ligation, 62

Intracellular Ca^{2+}
Calcium Preconditioning Elicits Strong Protection Against Ischemic Injury via Protein Kinase C Signaling Pathway, 137
Intracellular Ca^{2+}, Intercellular Electrical Coupling, and Mechanical Activity in Ischemic Rabbit Papillary Muscle: Effects of Preconditioning and Metabolic Blockade, 237

Intracellular receptor
Effects of Intracellular Angiotensin II in Vascular Smooth Muscle Cells, 765

Intravital microscopy
Variation in the Velocity, Deformation, and Adhesion Energy Density of Leukocytes Rolling Within Venules, 1122

Iodotubercidin
Quantitative Relation Between Interstitial Adenosine Concentration and Coronary Blood Flow, 601

Ion channel
Cell Cycle–Dependent Expression of L- and T-Type Ca^{2+} Currents in Rat Aortic Smooth Muscle Cells in Primary Culture, 14
Cellular and Ionic Basis of Arrhythmias in Postinfarction Remodeled Ventricular Myocardium, 461

Ischemia
Activation of β-Adrenergic Receptor Kinase During Myocardial Ischemia, 455
Calcium Preconditioning Elicits Strong Protection Against Ischemic Injury via Protein Kinase C Signaling Pathway, 137
Intracellular Ca^{2+}, Intercellular Electrical Coupling, and Mechanical Activity in Ischemic Rabbit Papillary Muscle: Effects of Preconditioning and Metabolic Blockade, 237
Regulation of Cardiac Ca^{2+} Release Channel (Ryanodine Receptor) by Ca^{2+}, H^+, Mg^{2+}, and Adenine Nucleotides Under Normal and Simulated Ischemic Conditions, 1100

Ischemia/reperfusion
Stimulation of the Stress-Activated Mitogen-Activated Protein Kinase Subfamilies in Perfused Heart: p38/RK Mitogen-Activated Protein Kinases and c-Jun N-Terminal Kinases Are Activated by Ischemia/Reperfusion, 162

Ischemic preconditioning
No Prevention of Ischemic Preconditioning by the Protein Kinase C Inhibitor Staurosporine in Swine, 407
PD 81,723, an Allosteric Enhancer of the A_1 Adenosine Receptor, Lowers the Threshold for Ischemic Preconditioning in Dogs, 415
Protein Kinase C–Induced Changes in the Stoichiometry of ATP Binding Activate Cardiac ATP-Sensitive K^+ Channels: A Possible Mechanistic Link to Ischemic Preconditioning, 399
Role of Protein Kinase C in Ischemic Preconditioning: Player or Spectator?, 627
Time Course of Late Preconditioning Against Myocardial Stunning in Conscious Pigs, 424

Isolated heart
Exogenously Administered Growth Hormone and Insulin-like Growth Factor-I Alter Intracellular Ca^{2+} Handling and Enhance Cardiac Performance: In Vitro Evaluation in the Isolated Isovolumic Buffer–Perfused Rat Heart, 227

Isolated vessel
Vasodilatory Effect of Pulsatile Pressure on Coronary Resistance Vessels, 1039

K

K^+ channel
Alterations in Rat Interlobar Artery Membrane Potential and K^+ Channels in Genetic and Nongenetic Hypertension, 295
Angiotensin II Type 2 Receptor–Mediated Regulation of Rat Neuronal K^+ Channels, 302
Differential Expression of Voltage-Gated K^+ Channel Genes in Left Ventricular Remodeled Myocardium After Experimental Myocardial Infarction, 669
Gender Differences in Coronary Artery Diameter Involve Estrogen, Nitric Oxide, and Ca^{2+}-Dependent K^+ Channels, 1024

Modulatory Effects of Arachidonic Acid on the Delayed Rectifier K^+ Current in Rat Pulmonary Arterial Myocytes: Structural Aspects and Involvement of Protein Kinase C, 20
Role of the Kv4.3 K^+ Channel in Ventricular Muscle: A Molecular Correlate for the Transient Outward Current, 659

K^+ efflux
Simulation of Action Potentials From Metabolically Impaired Cardiac Myocytes: Role of ATP-Sensitive K^+ Current, 208

L

L- and D-*S*-nitrosocysteine
Hemodynamic Effects of L- and D-*S*-Nitrosocysteine in the Rat: Stereoselective *S*-Nitrosothiol Recognition Sites, 256

Lactate
Attenuated Glycogenolysis Reduces Glycolytic Catabolite Accumulation During Ischemia in Preconditioned Rat Hearts, 435

Lactate oxidation
Cardiac Efficiency Is Improved After Ischemia by Altering Both the Source and Fate of Protons, 940

L-arginine
Role of Endothelium-Related Mechanisms in the Pathophysiology of Renal Ischemia/Reperfusion in Normal Rabbits, 1031

LDL transport
Effects of Pressure-Induced Stretch and Convection on Low-Density Lipoprotein and Albumin Uptake in the Rabbit Aortic Wall, 532

Leukocyte
Heterogeneity of Expression of E- and P-Selectins In Vivo, 560

Leupeptin
Inhomogeneous Disappearance of Myofilament-Related Cytoskeletal Proteins in Stunned Myocardium of Guinea Pig, 447

Lidocaine
Lidocaine Block of LQT-3 Mutant Human Na^+ Channels, 103

Linearity
Linearity of Pulsatile Pressure-Flow Relations in the Embryonic Chick Vascular System, 864

L-NAME
A Balance Between Nitric Oxide and Oxidants Regulates Mast Cell–Dependent Neutrophil–Endothelial Cell Interactions, 992

Locomotor activity
Heart Failure in Rats Causes Changes in Skeletal Muscle Morphology and Gene Expression That Are Not Explained by Reduced Activity, 128

Long QT syndrome
Lidocaine Block of LQT-3 Mutant Human Na^+ Channels, 103

Lung transplantation
cAMP-Mediated Vascular Protection in an Orthotopic Rat Lung Transplant Model: Insights Into the Mechanism of Action of Prostaglandin E_1 to Improve Lung Preservation, 773

Lymphocyte
Adhesion of Memory Lymphocytes to Vascular Cell Adhesion Molecule-1–Transduced Human Vascular Endothelial Cells Under Simulated Physiological Flow Conditions In Vitro, 1205

***lyso*-phosphatidic acid**
Selectively Enhanced Cellular Signaling by G_i Proteins in Essential Hypertension: $G\alpha_{i2}$, $G\alpha_{i3}$, and $G\beta_2$ Are Not Mutated, 974

M

MAP kinase
MAP Kinase Activation by Flow in Endothelial Cells: Role of $\beta 1$ Integrins and Tyrosine Kinases, 310

Mapping
The Electrophysiological Mechanism of Ventricular Arrhythmias in the Long QT Syndrome: Tridimensional Mapping of Activation and Recovery Patterns, 474

Matrix metalloproteinase
In Vivo Collagen Turnover Following Experimental Balloon Angioplasty Injury and the Role of Matrix Metalloproteinases, 541
Overexpression of Tissue Inhibitor of Matrix Metalloproteinase-1 Inhibits Vascular Smooth Muscle Cell Functions In Vitro and In Vivo, 812

Mechanical factors
Pressure and Angiotensin II Synergistically Induce Aortic Fibronectin Expression in Organ Culture Model of Rabbit Aorta: Evidence for a Pressure-Induced Tissue Renin-Angiotensin System, 70

Mechanical strain
Role of Mechanical Strain in Regulation of Differentiation of Vascular Smooth Muscle Cells, 1054

Mechanical stress
Mechanical Strain Increases Smooth Muscle and Decreases Nonmuscle Myosin Expression in Rat Vascular Smooth Muscle Cells, 1046

Mechanotransduction
Macromolecular Composition of Stress Fiber–Plasma Membrane Attachment Sites in Endothelial Cells In Situ, 1000
Muscle Length Directs Sympathetic Nerve Activity and Vasomotor Tone in Resistance Vessels of Hamster Retractor, 551
Phosphorylation of Endothelial Nitric Oxide Synthase in Response to Fluid Shear Stress, 984

Membrane potential
Alterations in Rat Interlobar Artery Membrane Potential and K^+ Channels in Genetic and Nongenetic Hypertension, 295
Role of an Electrogenic Na^+-HCO_3^- Cotransport in Determining Myocardial pH_i After an Increase in Heart Rate, 698
Role of Ca^{2+}-Activated K^+ Channels in the Regulation of Membrane Potential and Tone of Smooth Muscle in Human Pial Arteries, 881

Microcirculation
Distinct Phenotype of E-Selectin–Deficient Mice: E-Selectin Is Required for Slow Leukocyte Rolling In Vivo, 1196
Identification of a Putative Microvascular Oxygen Sensor, 54
Muscle Length Directs Sympathetic Nerve Activity and Vasomotor Tone in Resistance Vessels of Hamster Retractor, 551
Rapid Microvessel Rarefaction With Elevated Salt Intake and Reduced Renal Mass Hypertension in Rats, 324

Microspheres
Basic Fibroblast Growth Factor Increases Collateral Blood Flow in Rats With Femoral Arterial Ligation, 62

Microvascular endothelium
Role of Endothelium-Derived Nitric Oxide in the Modulation of Canine Myocardial Mitochondrial Respiration In Vitro: Implications for the Development of Heart Failure, 381

Microvessel density
Rapid Microvessel Rarefaction With Elevated Salt Intake and Reduced Renal Mass Hypertension in Rats, 324

Migration
Differential Expression of α_1 Type VIII Collagen in Injured Platelet-Derived Growth Factor-BB–Stimulated Rat Carotid Arteries, 524

Mini review
Cardiogenesis and Cardiac-Specific Gene Regulation, 4
Gap Junctions in Vascular Tissues, 631
Molecular Mechanisms of Coronary Collateral Vessel Growth, 911
NO and Cardiac Function, 363

Mitochondrial enzymes
Compensatory Mechanisms Associated With the Hyperdynamic Function of Phospholamban-Deficient Mouse Hearts, 1064

Mitogen-activated protein kinase
Angiotensin II Stimulates MAP Kinase Kinase Kinase Activity in Vascular Smooth Muscle Cells: Role of Raf, 1007
Stimulation of the Stress-Activated Mitogen-Activated Protein Kinase Subfamilies in Perfused Heart: p38/RK Mitogen-Activated Protein Kinases and c-Jun N-Terminal Kinases Are Activated by Ischemia/Reperfusion, 162

Mitogenesis
Oleic Acid–Induced Mitogenic Signaling in Vascular Smooth Muscle Cells: A Role for Protein Kinase C, 611

Model
Quantitative Relation Between Interstitial Adenosine Concentration and Coronary Blood Flow, 601

Molecular genetics
Lidocaine Block of LQT-3 Mutant Human Na^+ Channels, 103

Monocyte chemotactic protein-1
Thrombin Potently Stimulates Cytokine Production in Human Vascular Smooth Muscle Cells but Not in Mononuclear Phagocytes, 286

Mouse
Characterization of the Endothelium-Specific Murine Vascular Endothelial Growth Factor Receptor-2 (Flk-1) Promoter, 277

Mouse embryo
In Vivo Assessment of Embryonic Cardiovascular Dimensions and Function in Day-10.5 to -14.5 Mouse Embryos, 247

Mouse heart
Developmental Changes in the Delayed Rectifier K^+ Channels in Mouse Heart, 79

mRNA expression
Role of the Kv4.3 K^+ Channel in Ventricular Muscle: A Molecular Correlate for the Transient Outward Current, 659

mRNA levels
Differential Expression of Voltage-Gated K^+ Channel Genes in Left Ventricular Remodeled Myocardium After Experimental Myocardial Infarction, 669

Muscarinic acetylcholine receptors
Molecular and Functional Identification of m_1 Muscarinic Acetylcholine Receptors in Rat Ventricular Myocytes, 86

Muscle contraction
Effects of Thyroid Hormone on Left Ventricular Performance and Regulation of Contractile and Ca^{2+}-Cycling Proteins in the Baboon: Implications for the Force-Frequency and Relaxation-Frequency Relationships, 727

Muscle mechanics
Titin Develops Restoring Force in Rat Cardiac Myocytes, 619

Muscle relaxation
Effects of Thyroid Hormone on Left Ventricular Performance and Regulation of Contractile and Ca^{2+}-Cycling Proteins in the Baboon: Implications for the Force-Frequency and Relaxation-Frequency Relationships, 727

Myocardial contractility
Exogenously Administered Growth Hormone and Insulin-like Growth Factor-I Alter Intracellular Ca^{2+} Handling and Enhance Cardiac Performance: In Vitro Evaluation in the Isolated Isovolumic Buffer–Perfused Rat Heart, 227

Myocardial infarction
Cellular and Ionic Basis of Arrhythmias in Postinfarction Remodeled Ventricular Myocardium, 461
Differential Expression of Voltage-Gated K^+ Channel Genes in Left Ventricular Remodeled Myocardium After Experimental Myocardial Infarction, 669

Myocardial ischemia
Apoptosis in Ischemic and Reperfused Rat Myocardium, 949
No Prevention of Ischemic Preconditioning by the Protein Kinase C Inhibitor Staurosporine in Swine, 407
Simulation of Action Potentials From Metabolically Impaired Cardiac Myocytes: Role of ATP-Sensitive K^+ Current, 208

Myocardial metabolism
Function and Production of Nitric Oxide in the Coronary Circulation of the Conscious Dog During Exercise, 840

Myocardial stunning
Time Course of Late Preconditioning Against Myocardial Stunning in Conscious Pigs, 424

Myocyte
Thrombin Activates the Sarcolemmal Na^+-H^+ Exchanger: Evidence for a Receptor-Mediated Mechanism Involving Protein Kinase C, 705
Titin Develops Restoring Force in Rat Cardiac Myocytes, 619

Myocyte stretch
Mechanical Stretch Induces Enhanced Expression of Angiotensin II Receptor Subtypes in Neonatal Rat Cardiac Myocytes, 887

Myogenic response
Vasodilatory Effect of Pulsatile Pressure on Coronary Resistance Vessels, 1039

Myosin
Effects of Thyroid Hormone on Left Ventricular Performance and Regulation of Contractile and Ca^{2+}-Cycling Proteins in the Baboon: Implications for the Force-Frequency and Relaxation-Frequency Relationships, 727
Mechanical Strain Increases Smooth Muscle and Decreases Nonmuscle Myosin Expression in Rat Vascular Smooth Muscle Cells, 1046

N

Na^+ channel
Lidocaine Block of LQT-3 Mutant Human Na^+ Channels, 103

Na^+-Ca^{2+} exchange
Ca^{2+} Influx During the Cardiac Action Potential in Guinea Pig Ventricular Myocytes, 194

Na^+-HCO_3^- cotransport
Role of an Electrogenic Na^+-HCO_3^- Cotransport in Determining Myocardial pH_i After an Increase in Heart Rate, 698

Na^+-H^+ exchanger
Cardiac Efficiency Is Improved After Ischemia by Altering Both the Source and Fate of Protons, 940
Thrombin Activates the Sarcolemmal Na^+-H^+ Exchanger: Evidence for a Receptor-Mediated Mechanism Involving Protein Kinase C, 705

Neonatal cardiac myocytes
An Improved Permeabilization Protocol for the Introduction of Peptides Into Cardiac Myocytes: Application to Protein Kinase C Research, 1086

Neuron
Angiotensin II Type 2 Receptor–Mediated Regulation of Rat Neuronal K^+ Channels, 302

Neurotrophin
Expression of mRNAs for Neurotrophins and Their Receptors in Developing Rat Heart, 930

Neutrophil
Apoptosis in Ischemic and Reperfused Rat Myocardium, 949
Role of Endothelium-Related Mechanisms in the Pathophysiology of Renal Ischemia/Reperfusion in Normal Rabbits, 1031

NO
Effect of Tetrahydrobiopterin on Endothelial Function in Canine Middle Cerebral Arteries, 336
Expression of Inducible Nitric Oxide Synthase Inhibits Platelet Adhesion and Restores Blood Flow in the Injured Artery, 38
Function and Production of Nitric Oxide in the Coronary Circulation of the Conscious Dog During Exercise, 840
Gender Differences in Coronary Artery Diameter Involve Estrogen, Nitric Oxide, and Ca^{2+}-Dependent K^+ Channels, 1024
Hemodynamic Effects of L- and D-*S*-Nitrosocysteine in the Rat: Stereoselective *S*-Nitrosothiol Recognition Sites, 256
Increased Nitric Oxide Synthesis and Action Preclude Choroidal Vasoconstriction to Hyperoxia in Newborn Pigs, 504
Prostaglandins Maintain Renal Vasodilation and Hyperfiltration During Chronic Nitric Oxide Synthase Blockade in Conscious Pregnant Rats, 1161
Role of Endothelium-Derived Nitric Oxide in Coronary Vasodilatation Induced by Pacing Tachycardia in Humans, 331
Role of Endothelium-Related Mechanisms in the Pathophysiology of Renal Ischemia/Reperfusion in Normal Rabbits, 1031

NO synthase
Coronary and Systemic Hemodynamic Effects of Sustained Inhibition of Nitric Oxide Synthesis in Conscious Dogs: Evidence for Cross Talk Between Nitric Oxide and Cyclooxygenase in Coronary Vessels, 343
Effect of Tetrahydrobiopterin on Endothelial Function in Canine Middle Cerebral Arteries, 336
Pulse Pressure-Related Changes in Coronary Flow In Vivo Are Modulated by Nitric Oxide and Adenosine, 849

Norepinephrine
α_1-Adrenergic Activation Inhibits β-Adrenergic–Stimulated Unitary Ca^{2+} Currents in Cardiac Ventricular Myocytes, 184

NOS3 mRNA
Sustained Increase in Aortic Endothelial Nitric Oxide Synthase Expression In Vivo in a Model of Chronic High Blood Flow, 857

Nuclear factor κB
Role of Reactive Oxygen Intermediates in Cytomegalovirus Gene Expression and in the Response of Human Smooth Muscle Cells to Viral Infection, 1143

Nuclear magnetic resonance
Compensatory Mechanisms Associated With the Hyperdynamic Function of Phospholamban-Deficient Mouse Hearts, 1064

5′-nucleotidase
Monocyte- and Cytokine-Induced Downregulation of Angiotensin-Converting Enzyme in Cultured Human and Porcine Endothelial Cells, 512

O

O_2 transport
Disruption of Hemoglobin Oxygen Transport Does Not Impact Oxygen-Dependent Physiological Processes in Developing Embryos of Zebra Fish (*Danio rerio*), 358

Octanol
Triggered Propagated Contractions in Rat Cardiac Trabeculae: Inhibition by Octanol and Heptanol, 1077

Oleic acid
Oleic Acid–Induced Mitogenic Signaling in Vascular Smooth Muscle Cells: A Role for Protein Kinase C, 611

Open probability
Angiotensin II Type 2 Receptor–Mediated Regulation of Rat Neuronal K^+ Channels, 302

Optical mapping
Modulation of Ventricular Repolarization by a Premature Stimulus: Role of Epicardial Dispersion of Repolarization Kinetics Demonstrated by Optical Mapping of the Intact Guinea Pig Heart, 493
Shock-Induced Depolarization of Refractory Myocardium Prevents Wave-Front Propagation in Defibrillation, 957
Spatial Changes in Transmembrane Potential During Extracellular Electrical Shocks in Cultured Monolayers of Neonatal Rat Ventricular Myocytes, 676

Oscillatory contraction
Activation of Purinergic Receptors Triggers Oscillatory Contractions in Adult Rat Ventricular Myocytes, 94

Oxidized LDL
Mildly Oxidized LDL Evokes a Sustained Ca^{2+}-Dependent Retraction of Vascular Smooth Muscle Cells, 871

Oxygen
Identification of a Putative Microvascular Oxygen Sensor, 54

Oxygen consumption
Function and Production of Nitric Oxide in the Coronary Circulation of the Conscious Dog During Exercise, 840
Role of Endothelium-Derived Nitric Oxide in the Modulation of Canine Myocardial Mitochondrial Respiration In Vitro: Implications for the Development of Heart Failure, 381

Oxygen-derived free radicals
Oxygen-Derived Free Radicals Contribute to Baroreceptor Dysfunction in Atherosclerotic Rabbits, 802

P

p38/reactivating kinase
Stimulation of the Stress-Activated Mitogen-Activated Protein Kinase Subfamilies in Perfused Heart: p38/RK Mitogen-Activated Protein Kinases and c-Jun N-Terminal Kinases Are Activated by Ischemia/Reperfusion, 162

Pacemaker current
A Cellular Mechanism Contributing to Postvagal Tachycardia Studied in Isolated Pacemaker Cells From Cat Right Atrium, 109

Patch clamp
Cellular and Ionic Basis of Arrhythmias in Postinfarction Remodeled Ventricular Myocardium, 461
Protein Kinase C–Induced Changes in the Stoichiometry of ATP Binding Activate Cardiac ATP-Sensitive K^+ Channels: A Possible Mechanistic Link to Ischemic Preconditioning, 399

Pentasaccharide
Biochemical and Pharmacological Properties of SANORG 32701: Comparison With the 'Synthetic Pentasaccharide' (SR 90107/ORG 31540) and Standard Heparin, 590

Perforated patch
A Cellular Mechanism Contributing to Postvagal Tachycardia Studied in Isolated Pacemaker Cells From Cat Right Atrium, 109

Perivascular sympathetic nerves
Muscle Length Directs Sympathetic Nerve Activity and Vasomotor Tone in Resistance Vessels of Hamster Retractor, 551

Permeabilization method
An Improved Permeabilization Protocol for the Introduction of Peptides Into Cardiac Myocytes: Application to Protein Kinase C Research, 1086

8-Phenyltheophylline
Quantitative Relation Between Interstitial Adenosine Concentration and Coronary Blood Flow, 601

pH_i
Role of an Electrogenic Na^+-HCO_3^- Cotransport in Determining Myocardial pH_i After an Increase in Heart Rate, 698

Phospholamban
Compensatory Mechanisms Associated With the Hyperdynamic Function of Phospholamban-Deficient Mouse Hearts, 1064
Phospholamban: A Prominent Regulator of Myocardial Contractility, 1059

Phospholipases
Prostacyclin Formation Elicited by Endothelin-1 in Rat Aorta Is Mediated via Phospholipase D Activation and Not Phospholipase C or A_2, 271

Phosphorylase
Attenuated Glycogenolysis Reduces Glycolytic Catabolite Accumulation During Ischemia in Preconditioned Rat Hearts, 435

Phosphorylation
α_1-Adrenergic Activation Inhibits β-Adrenergic–Stimulated Unitary Ca^{2+} Currents in Cardiac Ventricular Myocytes, 184
Fibroblast Growth Factor-2 Decreases Metabolic Coupling and Stimulates Phosphorylation as Well as Masking of Connexin43 Epitopes in Cardiac Myocytes, 647

Pig
Time Course of Late Preconditioning Against Myocardial Stunning in Conscious Pigs, 424

Platelet
Expression of Inducible Nitric Oxide Synthase Inhibits Platelet Adhesion and Restores Blood Flow in the Injured Artery, 38

Platelet-activating factor
A Balance Between Nitric Oxide and Oxidants Regulates Mast Cell–Dependent Neutrophil–Endothelial Cell Interactions, 992

Platelet-derived growth factor
Fumagillin Analogue TNP-470 Inhibits DNA Synthesis of Vascular Smooth Muscle Cells Stimulated by Platelet-Derived Growth Factor and Insulin-like Growth Factor-I: Possible Involvement of Cyclin-Dependent Kinase 2, 757
Mechanical Strain Increases Smooth Muscle and Decreases Nonmuscle Myosin Expression in Rat Vascular Smooth Muscle Cells, 1046
Selectively Enhanced Cellular Signaling by G_i Proteins in Essential Hypertension: $G\alpha_{i2}$, $G\alpha_{i3}$, and $G\beta_2$ Are Not Mutated, 974

Porcine aortic smooth muscle cell
Functional Implications of a Newly Characterized Pathway of 11,12-Epoxyeicosatrienoic Acid Metabolism in Arterial Smooth Muscle, 784

Porcine coronary artery
Functional Implications of a Newly Characterized Pathway of 11,12-Epoxyeicosatrienoic Acid Metabolism in Arterial Smooth Muscle, 784

Prazosin
α_1-Adrenergic Activation Inhibits β-Adrenergic–Stimulated Unitary Ca^{2+} Currents in Cardiac Ventricular Myocytes, 184

Preconditioning
Calcium Preconditioning Elicits Strong Protection Against Ischemic Injury via Protein Kinase C Signaling Pathway, 137
Intracellular Ca^{2+}, Intercellular Electrical Coupling, and Mechanical Activity in Ischemic Rabbit Papillary Muscle: Effects of Preconditioning and Metabolic Blockade, 237

Pressure
Effects of Pressure-Induced Stretch and Convection on Low-Density Lipoprotein and Albumin Uptake in the Rabbit Aortic Wall, 532

Programmed cell death
Vasoactive Substances Regulate Vascular Smooth Muscle Cell Apoptosis: Countervailing Influences of Nitric Oxide and Angiotensin II, 748

Proliferation
Cell Cycle–Dependent Expression of L- and T-Type Ca^{2+} Currents in Rat Aortic Smooth Muscle Cells in Primary Culture, 14
Insulin-like Growth Factor II Induces DNA Synthesis in Fetal Ventricular Myocytes In Vitro, 716
Selectively Enhanced Cellular Signaling by G_i Proteins in Essential Hypertension: $G\alpha_{i2}$, $G\alpha_{i3}$, and $G\beta_2$ Are Not Mutated, 974

Promoter
Characterization of the Endothelium-Specific Murine Vascular Endothelial Growth Factor Receptor-2 (Flk-1) Promoter, 277

Prostaglandin
Prostaglandins Maintain Renal Vasodilation and Hyperfiltration During Chronic Nitric Oxide Synthase Blockade in Conscious Pregnant Rats, 1161

Prostaglandin E_1
cAMP-Mediated Vascular Protection in an Orthotopic Rat Lung Transplant Model: Insights Into the Mechanism of Action of Prostaglandin E_1 to Improve Lung Preservation, 773

Prostaglandins
Prostacyclin Formation Elicited by Endothelin-1 in Rat Aorta Is Mediated via Phospholipase D Activation and Not Phospholipase C or A_2, 271

Protein kinase A
cAMP-Mediated Vascular Protection in an Orthotopic Rat Lung Transplant Model: Insights Into the Mechanism of Action of Prostaglandin E_1 to Improve Lung Preservation, 773

Protein kinase C
α_1-Adrenergic Activation Inhibits β-Adrenergic–Stimulated Unitary Ca^{2+} Currents in Cardiac Ventricular Myocytes, 184
An Improved Permeabilization Protocol for the Introduction of Peptides Into Cardiac Myocytes: Application to Protein Kinase C Research, 1086
Angiotensin II Stimulates MAP Kinase Kinase Kinase Activity in Vascular Smooth Muscle Cells: Role of Raf, 1007
Calcium Preconditioning Elicits Strong Protection Against Ischemic Injury via Protein Kinase C Signaling Pathway, 137
Modulatory Effects of Arachidonic Acid on the Delayed Rectifier K^+ Current in Rat Pulmonary Arterial Myocytes: Structural Aspects and Involvement of Protein Kinase C, 20
No Prevention of Ischemic Preconditioning by the Protein Kinase C Inhibitor Staurosporine in Swine, 407
Oleic Acid–Induced Mitogenic Signaling in Vascular Smooth Muscle Cells: A Role for Protein Kinase C, 611
Protein Kinase C–Induced Changes in the Stoichiometry of ATP Binding Activate Cardiac ATP-Sensitive K^+ Channels: A Possible Mechanistic Link to Ischemic Preconditioning, 399
Role of Protein Kinase C in Ischemic Preconditioning: Player or Spectator?, 627
Thrombin Activates the Sarcolemmal Na^+-H^+ Exchanger: Evidence for a Receptor-Mediated Mechanism Involving Protein Kinase C, 705
Thyroid Hormone Represses Protein Kinase C Isoform Expression and Activity in Rat Cardiac Myocytes, 388

Protein kinase C isoforms
Protein Kinase C Isoform Expression in Normal and Failing Rabbit Hearts, 153

Protein tyrosine phosphatase
Cloning and Characterization of Rat Density-Enhanced Phosphatase-1, a Protein Tyrosine Phosphatase Expressed by Vascular Cells, 570

Pulmonary artery
Modulatory Effects of Arachidonic Acid on the Delayed Rectifier K^+ Current in Rat Pulmonary Arterial Myocytes: Structural Aspects and Involvement of Protein Kinase C, 20

Pulmonary endothelial cell
Spontaneous Ca^{2+} Oscillations and Waves in Pulmonary Vascular Endothelial Cells, 909

Pulmonary hypertension
Tenascin-C Is Induced With Progressive Pulmonary Vascular Disease in Rats and Is Functionally Related to Increased Smooth Muscle Cell Proliferation, 1131

Pulmonary microcirculation
Ca^{2+} Waves in Lung Capillary Endothelium, 898

Pulsatile pressure
Vasodilatory Effect of Pulsatile Pressure on Coronary Resistance Vessels, 1039

Pulse pressure
Pulse Pressure-Related Changes in Coronary Flow In Vivo Are Modulated by Nitric Oxide and Adenosine, 849

Pulsed Doppler
In Vivo Assessment of Embryonic Cardiovascular Dimensions and Function in Day-10.5 to -14.5 Mouse Embryos, 247

Purinergic receptor
Activation of Purinergic Receptors Triggers Oscillatory Contractions in Adult Rat Ventricular Myocytes, 94

R

Rabbit
In Vivo Collagen Turnover Following Experimental Balloon Angioplasty Injury and the Role of Matrix Metalloproteinases, 541

Rabbit heart
Shock-Induced Depolarization of Refractory Myocardium Prevents Wave-Front Propagation in Defibrillation, 957

Radioligand
Binding of the Novel Nonxanthine A_{2A} Adenosine Receptor Antagonist [^{3}H]SCH58261 to Coronary Artery Membranes, 1153

Raf
Angiotensin II Stimulates MAP Kinase Kinase Kinase Activity in Vascular Smooth Muscle Cells: Role of Raf, 1007

Rarefaction
Rapid Microvessel Rarefaction With Elevated Salt Intake and Reduced Renal Mass Hypertension in Rats, 324

Rat
Ca^{2+} Waves in Lung Capillary Endothelium, 898
Hemodynamic Effects of L- and D-*S*-Nitrosocysteine in the Rat: Stereoselective *S*-Nitrosothiol Recognition Sites, 256

Rat cardiac trabecula
Triggered Propagated Contractions in Rat Cardiac Trabeculae: Inhibition by Octanol and Heptanol, 1077

Rat heart
Activation of β-Adrenergic Receptor Kinase During Myocardial Ischemia, 455

Rat heart myocytes
Molecular and Functional Identification of m_1 Muscarinic Acetylcholine Receptors in Rat Ventricular Myocytes, 86

Rat mesentery
Variation in the Velocity, Deformation, and Adhesion Energy Density of Leukocytes Rolling Within Venules, 1122

rDEP-1
Cloning and Characterization of Rat Density-Enhanced Phosphatase-1, a Protein Tyrosine Phosphatase Expressed by Vascular Cells, 570

Reactive hyperemia
Coronary and Systemic Hemodynamic Effects of Sustained Inhibition of Nitric Oxide Synthesis in Conscious Dogs: Evidence for Cross Talk Between Nitric Oxide and Cyclooxygenase in Coronary Vessels, 343

Reactive oxygen intermediate
Role of Reactive Oxygen Intermediates in Cytomegalovirus Gene Expression and in the Response of Human Smooth Muscle Cells to Viral Infection, 1143

Receptor
α_1-Adrenergic Activation Inhibits β-Adrenergic–Stimulated Unitary Ca^{2+} Currents in Cardiac Ventricular Myocytes, 184
Mechanical Stretch Induces Enhanced Expression of Angiotensin II Receptor Subtypes in Neonatal Rat Cardiac Myocytes, 887

Reentry
Modulation of Ventricular Repolarization by a Premature Stimulus: Role of Epicardial Dispersion of Repolarization Kinetics Demonstrated by Optical Mapping of the Intact Guinea Pig Heart, 493

The Electrophysiological Mechanism of Ventricular Arrhythmias in the Long QT Syndrome: Tridimensional Mapping of Activation and Recovery Patterns, 474

Refractoriness
Shock-Induced Depolarization of Refractory Myocardium Prevents Wave-Front Propagation in Defibrillation, 957

Renal blood flow
Prostaglandins Maintain Renal Vasodilation and Hyperfiltration During Chronic Nitric Oxide Synthase Blockade in Conscious Pregnant Rats, 1161

Renal hypertension
Rapid Microvessel Rarefaction With Elevated Salt Intake and Reduced Renal Mass Hypertension in Rats, 324

Renal vascular resistance
Prostaglandins Maintain Renal Vasodilation and Hyperfiltration During Chronic Nitric Oxide Synthase Blockade in Conscious Pregnant Rats, 1161

Reperfusion
Cardiac Efficiency Is Improved After Ischemia by Altering Both the Source and Fate of Protons, 940
No Prevention of Ischemic Preconditioning by the Protein Kinase C Inhibitor Staurosporine in Swine, 407

Reperfusion injury
Apoptosis in Ischemic and Reperfused Rat Myocardium, 949

Repolarization
Modulation of Ventricular Repolarization by a Premature Stimulus: Role of Epicardial Dispersion of Repolarization Kinetics Demonstrated by Optical Mapping of the Intact Guinea Pig Heart, 493

Restenosis
In Vivo Collagen Turnover Following Experimental Balloon Angioplasty Injury and the Role of Matrix Metalloproteinases, 541
Overexpression of Tissue Inhibitor of Matrix Metalloproteinase-1 Inhibits Vascular Smooth Muscle Cell Functions In Vitro and In Vivo, 812
Thrombin Potently Stimulates Cytokine Production in Human Vascular Smooth Muscle Cells but Not in Mononuclear Phagocytes, 286
Upregulation of Basement Membrane–Degrading Metalloproteinase Secretion After Balloon Injury of Pig Carotid Arteries, 1177

Restoring force
Titin Develops Restoring Force in Rat Cardiac Myocytes, 619

Retina
Increased Nitric Oxide Synthesis and Action Preclude Choroidal Vasoconstriction to Hyperoxia in Newborn Pigs, 504

Rolling
Endothelial Adhesion Molecules in Atherogenesis: A Concerto or a Solo?, 1216

Ryanodine receptor
Effects of FK-506 on Contraction and Ca^{2+} Transients in Rat Cardiac Myocytes, 1110

S

SANORG 32701
Biochemical and Pharmacological Properties of SANORG 32701: Comparison With the 'Synthetic Pentasaccharide' (SR 90107/ORG 31540) and Standard Heparin, 590

Sarcolemmal Ca^{2+} channel
Effects of FK-506 on Contraction and Ca^{2+} Transients in Rat Cardiac Myocytes, 1110

Sarcoplasmic reticulum
Compensatory Mechanisms Associated With the Hyperdynamic Function of Phospholamban-Deficient Mouse Hearts, 1064
Effects of FK-506 on Contraction and Ca^{2+} Transients in Rat Cardiac Myocytes, 1110
Effects of Thyroid Hormone on Left Ventricular Performance and Regulation of Contractile and Ca^{2+}-Cycling Proteins in the Baboon: Implications for the Force-Frequency and Relaxation-Frequency Relationships, 727
Phospholamban: A Prominent Regulator of Myocardial Contractility, 1059

Sarcoplasmic reticulum Ca^{2+} release
Ca^{2+} Influx During the Cardiac Action Potential in Guinea Pig Ventricular Myocytes, 194

SCH58261
Binding of the Novel Nonxanthine A_{2A} Adenosine Receptor Antagonist [^{3}H]SCH58261 to Coronary Artery Membranes, 1153

Secondary source
Spatial Changes in Transmembrane Potential During Extracellular Electrical Shocks in Cultured Monolayers of Neonatal Rat Ventricular Myocytes, 676

Selectin
Heterogeneity of Expression of E- and P-Selectins In Vivo, 560
Variation in the Velocity, Deformation, and Adhesion Energy Density of Leukocytes Rolling Within Venules, 1122

Serotonin
Depression of Endothelial Nitric Oxide Synthase but Increased Expression of Endothelin-1 Immunoreactivity in Rat Thoracic Aortic Endothelium Associated With Long-term, but Not Short-term, Sympathectomy, 317

Shear rate
Distinct Phenotype of E-Selectin–Deficient Mice: E-Selectin Is Required for Slow Leukocyte Rolling In Vivo, 1196

Shear stress
Macromolecular Composition of Stress Fiber–Plasma Membrane Attachment Sites in Endothelial Cells In Situ, 1000
Shear Stress Modulates Expression of Cu/Zn Superoxide Dismutase in Human Aortic Endothelial Cells, 32
Sustained Increase in Aortic Endothelial Nitric Oxide Synthase Expression In Vivo in a Model of Chronic High Blood Flow, 857

Signal transduction
Angiotensin II Stimulates MAP Kinase Kinase Kinase Activity in Vascular Smooth Muscle Cells: Role of Raf, 1007
Fluid Flow Rapidly Activates G Proteins in Human Endothelial Cells: Involvement of G Proteins in Mechanochemical Signal Transduction, 834
MAP Kinase Activation by Flow in Endothelial Cells: Role of $\beta 1$ Integrins and Tyrosine Kinases, 310
Nitric Oxide and Cardiac Function, 363
Protein Kinase C Isoform Expression in Normal and Failing Rabbit Hearts, 153

Single cell
Cellular and Ionic Basis of Arrhythmias in Postinfarction Remodeled Ventricular Myocardium, 461

Skeletal muscle
Basic Fibroblast Growth Factor Increases Collateral Blood Flow in Rats With Femoral Arterial Ligation, 62
Heart Failure in Rats Causes Changes in Skeletal Muscle Morphology and Gene Expression That Are Not Explained by Reduced Activity, 128

Smooth muscle
Acute Reductions in Blood Flow and Shear Stress Induce Platelet-Derived Growth Factor-A Expression in Baboon Prosthetic Grafts, 45
Cell Cycle–Dependent Expression of L- and T-Type Ca^{2+} Currents in Rat Aortic Smooth Muscle Cells in Primary Culture, 14
Differential Expression of α_1 Type VIII Collagen in Injured Platelet-Derived Growth Factor-BB–Stimulated Rat Carotid Arteries, 524
Expression of mRNAs for Neurotrophins and Their Receptors in Developing Rat Heart, 930
Heparin-Binding Epidermal Growth Factor–Like Growth Factor Regulates Fibroblast Growth Factor-2 Expression in Aortic Smooth Muscle Cells, 263
Mildly Oxidized LDL Evokes a Sustained Ca^{2+}-Dependent Retraction of Vascular Smooth Muscle Cells, 871
Pressure and Angiotensin II Synergistically Induce Aortic Fibronectin Expression in Organ Culture Model of Rabbit Aorta: Evidence for a Pressure-Induced Tissue Renin-Angiotensin System, 70

Sodium chloride
Rapid Microvessel Rarefaction With Elevated Salt Intake and Reduced Renal Mass Hypertension in Rats, 324

Somatotropin
Exogenously Administered Growth Hormone and Insulin-like Growth Factor-I Alter Intracellular Ca^{2+} Handling and Enhance Cardiac Performance: In Vitro Evaluation in the Isolated Isovolumic Buffer–Perfused Rat Heart, 227

Spectrin
Inhomogeneous Disappearance of Myofilament-Related Cytoskeletal Proteins in Stunned Myocardium of Guinea Pig, 447

Sphingomyelinase
Ceramide Is Not a Signal for Tumor Necrosis Factor–Induced Gene Expression but Does Cause Programmed Cell Death in Human Vascular Endothelial Cells, 736

Staurosporine
No Prevention of Ischemic Preconditioning by the Protein Kinase C Inhibitor Staurosporine in Swine, 407

Stress-activated mitogen-activated protein kinase
Stimulation of the Stress-Activated Mitogen-Activated Protein Kinase Subfamilies in Perfused Heart: p38/RK Mitogen-Activated Protein Kinases and c-Jun N-Terminal Kinases Are Activated by Ischemia/Reperfusion, 162

Stretch
Effects of Pressure-Induced Stretch and Convection on Low-Density Lipoprotein and Albumin Uptake in the Rabbit Aortic Wall, 532

Superoxide
A Balance Between Nitric Oxide and Oxidants Regulates Mast Cell–Dependent Neutrophil–Endothelial Cell Interactions, 992
Shear Stress Modulates Expression of Cu/Zn Superoxide Dismutase in Human Aortic Endothelial Cells, 32

Superoxide anion
Effect of Tetrahydrobiopterin on Endothelial Function in Canine Middle Cerebral Arteries, 336

Superoxide dismutase
Effect of Tetrahydrobiopterin on Endothelial Function in Canine Middle Cerebral Arteries, 336
Oxygen-Derived Free Radicals Contribute to Baroreceptor Dysfunction in Atherosclerotic Rabbits, 802
Shear Stress Modulates Expression of Cu/Zn Superoxide Dismutase in Human Aortic Endothelial Cells, 32
Role of Endothelium-Related Mechanisms in the Pathophysiology of Renal Ischemia/Reperfusion in Normal Rabbits, 1031

Surface peptidase
Monocyte- and Cytokine-Induced Downregulation of Angiotensin-Converting Enzyme in Cultured Human and Porcine Endothelial Cells, 512

Swine
No Prevention of Ischemic Preconditioning by the Protein Kinase C Inhibitor Staurosporine in Swine, 407

Sympathectomy
Depression of Endothelial Nitric Oxide Synthase but Increased Expression of Endothelin-1 Immunoreactivity in Rat Thoracic Aortic Endothelium Associated With Long-term, but Not Short-term, Sympathectomy, 317

T

Tenascin-C
Tenascin-C Is Induced With Progressive Pulmonary Vascular Disease in Rats and Is Functionally Related to Increased Smooth Muscle Cell Proliferation, 1131

Tetracycline
Conditional Transgene Expression in the Heart, 691

Thickening fraction
Time Course of Late Preconditioning Against Myocardial Stunning in Conscious Pigs, 424

Thrombin receptor
Thrombin Activates the Sarcolemmal Na^+-H^+ Exchanger: Evidence for a Receptor-Mediated Mechanism Involving Protein Kinase C, 705

Thrombosis
Biochemical and Pharmacological Properties of SANORG 32701: Comparison With the 'Synthetic Pentasaccharide' (SR 90107/ORG 31540) and Standard Heparin, 590
Thrombin Potently Stimulates Cytokine Production in Human Vascular Smooth Muscle Cells but Not in Mononuclear Phagocytes, 286

Thyroid hormone
Thyroid Hormone Represses Protein Kinase C Isoform Expression and Activity in Rat Cardiac Myocytes, 388

Tissue inhibitor of matrix metalloproteinase
Overexpression of Tissue Inhibitor of Matrix Metalloproteinase-1 Inhibits Vascular Smooth Muscle Cell Functions In Vitro and In Vivo, 812

Titin
Titin Develops Restoring Force in Rat Cardiac Myocytes, 619

TNP-470
The Fumagillin Analogue TNP-470 Inhibits DNA Synthesis of Vascular Smooth Muscle Cells Stimulated by Platelet-Derived Growth Factor and Insulin-like Growth Factor-I: Possible Involvement of Cyclin-Dependent Kinase 2, 757

Transcription factor
Molecular Cloning and Characterization of Human Cardiac Homeobox Gene *CSX1*, 920

Transgenic
Conditional Transgene Expression in the Heart, 691

Transient outward current
Role of the Kv4.3 K^+ Channel in Ventricular Muscle: A Molecular Correlate for the Transient Outward Current, 659

Triggered propagated contraction
Triggered Propagated Contractions in Rat Cardiac Trabeculae: Inhibition by Octanol and Heptanol, 1077

Tumor necrosis factor
Ceramide Is Not a Signal for Tumor Necrosis Factor–Induced Gene Expression but Does Cause Programmed Cell Death in Human Vascular Endothelial Cells, 736

Tumor necrosis factor-α
Monocyte- and Cytokine-Induced Downregulation of Angiotensin-Converting Enzyme in Cultured Human and Porcine Endothelial Cells, 512

Tyrosine kinase
Phosphorylation of Endothelial Nitric Oxide Synthase in Response to Fluid Shear Stress, 984

V

Vascular biology
Pulse Pressure-Related Changes in Coronary Flow In Vivo Are Modulated by Nitric Oxide and Adenosine, 849

Vascular cell adhesion molecule-1
Endothelial Adhesion Molecules in Atherogenesis: A Concerto or a Solo?, 1216

Vascular endothelial cell
Ceramide Is Not a Signal for Tumor Necrosis Factor–Induced Gene Expression but Does Cause Programmed Cell Death in Human Vascular Endothelial Cells, 736

Vascular endothelial growth factor receptor
Characterization of the Endothelium-Specific Murine Vascular Endothelial Growth Factor Receptor-2 (Flk-1) Promoter, 277

Vascular physiology
Gap Junctions in Vascular Tissues: Evaluating the Role of Intercellular Communication in the Modulation of Vasomotor Tone, 631

Vascular relaxation
Hemodynamic Effects of L- and D-*S*-Nitrosocysteine in the Rat: Stereoselective *S*-Nitrosothiol Recognition Sites, 256

Vascular remodeling
Oleic Acid–Induced Mitogenic Signaling in Vascular Smooth Muscle Cells: A Role for Protein Kinase C, 611
Pressure and Angiotensin II Synergistically Induce Aortic Fibronectin Expression in Organ Culture Model of Rabbit Aorta: Evidence for a Pressure-Induced Tissue Renin-Angiotensin System, 70
Vasoactive Substances Regulate Vascular Smooth Muscle Cell Apoptosis: Countervailing Influences of Nitric Oxide and Angiotensin II, 748

Vascular retraction
Mildly Oxidized LDL Evokes a Sustained Ca^{2+}-Dependent Retraction of Vascular Smooth Muscle Cells, 871

Vascular smooth muscle
Alterations in Rat Interlobar Artery Membrane Potential and K^+ Channels in Genetic and Nongenetic Hypertension, 295
Effects of Intracellular Angiotensin II in Vascular Smooth Muscle Cells, 765
Expression of Inducible Nitric Oxide Synthase Inhibits Platelet Adhesion and Restores Blood Flow in the Injured Artery, 38
Gap Junctions in Vascular Tissues: Evaluating the Role of Intercellular Communication in the Modulation of Vasomotor Tone, 631
Insulin Signaling and Its Regulation of System A Amino Acid Uptake in Cultured Rat Vascular Smooth Muscle Cells, 1167
Mechanical Strain Increases Smooth Muscle and Decreases Nonmuscle Myosin Expression in Rat Vascular Smooth Muscle Cells, 1046
Modulatory Effects of Arachidonic Acid on the Delayed Rectifier K^+ Current in Rat Pulmonary Arterial Myocytes: Structural Aspects and Involvement of Protein Kinase C, 20
Oleic Acid–Induced Mitogenic Signaling in Vascular Smooth Muscle Cells: A Role for Protein Kinase C, 611
Role of Mechanical Strain in Regulation of Differentiation of Vascular Smooth Muscle Cells, 1054
Upregulation of Basement Membrane–Degrading Metalloproteinase Secretion After Balloon Injury of Pig Carotid Arteries, 1177
Wall Remodeling During Luminal Expansion of Mesenteric Arterial Collaterals in the Rat, 1015

Vascular system
Macromolecular Composition of Stress Fiber–Plasma Membrane Attachment Sites in Endothelial Cells In Situ, 1000

Vascular wound response
Vascular Smooth Muscle $\alpha_v\beta_3$ Integrin Mediates Arteriolar Vasodilation in Response to RGD Peptides, 821

Vasoactive substances
Vasoactive Substances Regulate Vascular Smooth Muscle Cell Apoptosis: Countervailing Influences of Nitric Oxide and Angiotensin II, 748

Vasodilation
Gender Differences in Coronary Artery Diameter Involve Estrogen, Nitric Oxide, and Ca^{2+}-Dependent K^+ Channels, 1024
Vascular Smooth Muscle $\alpha_v\beta_3$ Integrin Mediates Arteriolar Vasodilation in Response to RGD Peptides, 821

Vasorelaxation
Phosphorylation of Endothelial Nitric Oxide Synthase in Response to Fluid Shear Stress, 984

Ventricular fibrillation
Shock-Induced Depolarization of Refractory Myocardium Prevents Wave-Front Propagation in Defibrillation, 957

Ventricular function
In Vivo Assessment of Embryonic Cardiovascular Dimensions and Function in Day-10.5 to -14.5 Mouse Embryos, 247

Ventricular myocyte
Anisotropic Activation Spread in Heart Cell Monolayers Assessed by High-Resolution Optical Mapping: Role of Tissue Discontinuities, 115
Cyclic ADP-Ribose Does Not Regulate Sarcoplasmic Reticulum Ca^{2+} Release in Intact Cardiac Myocytes, 147
Functional and Structural Assessment of Intercellular Communication: Increased Conduction Velocity and Enhanced Connexin Expression in Dibutyryl cAMP–Treated Cultured Cardiac Myocytes, 174
Insulin-like Growth Factor II Induces DNA Synthesis in Fetal Ventricular Myocytes In Vitro, 716

Ventricular tachycardia
The Electrophysiological Mechanism of Ventricular Arrhythmias in the Long QT Syndrome: Tridimensional Mapping of Activation and Recovery Patterns, 474

Venule
Distinct Phenotype of E-Selectin–Deficient Mice: E-Selectin Is Required for Slow Leukocyte Rolling In Vivo, 1196

Video microscopy
In Vivo Assessment of Embryonic Cardiovascular Dimensions and Function in Day-10.5 to -14.5 Mouse Embryos, 247

Voltage-sensitive dye
Anisotropic Activation Spread in Heart Cell Monolayers Assessed by High-Resolution Optical Mapping: Role of Tissue Discontinuities, 115
Functional and Structural Assessment of Intercellular Communication: Increased Conduction Velocity and Enhanced Connexin Expression in Dibutyryl cAMP–Treated Cultured Cardiac Myocytes, 174
Modulation of Ventricular Repolarization by a Premature Stimulus: Role of Epicardial Dispersion of Repolarization Kinetics Demonstrated by Optical Mapping of the Intact Guinea Pig Heart, 493

W

Wall remodeling
Wall Remodeling During Luminal Expansion of Mesenteric Arterial Collaterals in the Rat, 1015

Whole cell
A Cellular Mechanism Contributing to Postvagal Tachycardia Studied in Isolated Pacemaker Cells From Cat Right Atrium, 109

Wortmannin
Insulin Signaling and Its Regulation of System A Amino Acid Uptake in Cultured Rat Vascular Smooth Muscle Cells, 1167

Z

Zebra fish
Disruption of Hemoglobin Oxygen Transport Does Not Impact Oxygen-Dependent Physiological Processes in Developing Embryos of Zebra Fish (*Danio rerio*), 358
